

A large, dark-hulled yacht with a white upper section is shown from a side profile, moving from left to right across the frame. The yacht has a prominent cabin with large windows and a radar dome on top. An American flag is mounted on the stern, and a red flag is at the bow. The boat is creating a white wake in the blue water. In the background, a coastal town with various houses and a church steeple is visible on a hillside under a clear sky.

THE SABRE 45 SALON EXPRESS

SABRE
Yachts
SINCE 1970

Over the last fifteen years, the Sabre range of Salon Express motor yachts has redefined the Downeast style boating market. Unlike typical express cruisers, which tend to go out on those all too rare perfect days, owners of the salon express style can enjoy boating each and every day of the season, tucked in the comfort and quiet of a climate controlled interior.

An abundance of light and air enter the main salon through large opening windows, overhead hatches, an aft swing door and an electrically controlled drop down window.

A standard helm door offers the helmsperson immediate access to the side deck. Her helm is equipped with Volvo's Glass Cockpit system offering two Multi Function Displays.

Two full staterooms, each with their own head and stall shower, are located on the lower level. The master stateroom forward is a quiet oasis for her owner and offers many drawers and lockers for best-in-class stowage capacity.

An ensuite head with stall shower is found to port.

Guests will enjoy their own private stateroom to starboard.

The attached guest head is accessible from both the companionway and the guest stateroom.

Opposite the guest stateroom to port is the full galley with all of the right appliances for the preparation of gourmet meals aboard.

A unique feature of the Sabre 45 is the large utility space below the main salon sole where optional equipment such as washer, dryer, additional fridge or freezer or perhaps a wine cooler can be situated.

Her cockpit is an inviting space where the crew can relax underway and where everyone can gather at the end of a great day on the water. An optional Sureshade can be fitted at the yard.

Nautical sensibilities are important elements of each Sabre Design. Safety and security play a large part in the design of our decks. An aggressive anti slip pattern in the fiberglass, hand holds above the windows, large diameter perimeter rails and a wide foredeck, all provide a sense of security for the crew.

The optional Seakeeper is located on centerline as seen here in this bright and well planned engine room.

SPECIFICATIONS

LOA 49' 14.94 m
Hull Length 45' 13.71 m
Beam 14' 8" 4.47 m
Draft 3' 9" 1.14 m
Air Draft (with optional mast)
14' 2" 4.32 m
Displacement
37,000 lbs./16,783 kg
Cruise Speed (half load)
27 knots

Fuel Capacity
